

# Ngenea Panel for Adobe Premiere Pro

## Stop Waiting for Archived Media. Start Editing.

### Work with Archived Projects Without the Wait

The Ngenea Panel for Adobe Premiere Pro eliminates the frustration of working with archived media. Pre-stage your clips before you start editing, track restore progress in real-time, and archive finished projects—all without leaving Premiere Pro.

**For editors working with archived media,  
this changes everything.**

### The Problem: Archived Clips Destroy Creative Momentum

If your facility uses tiered storage or cloud archives, you've experienced this:

**You open a project. You scrub the timeline.  
Premiere Pro freezes.**

No progress bar. No time estimate. No control. Just waiting while archived clips restore one-by-one in the background.

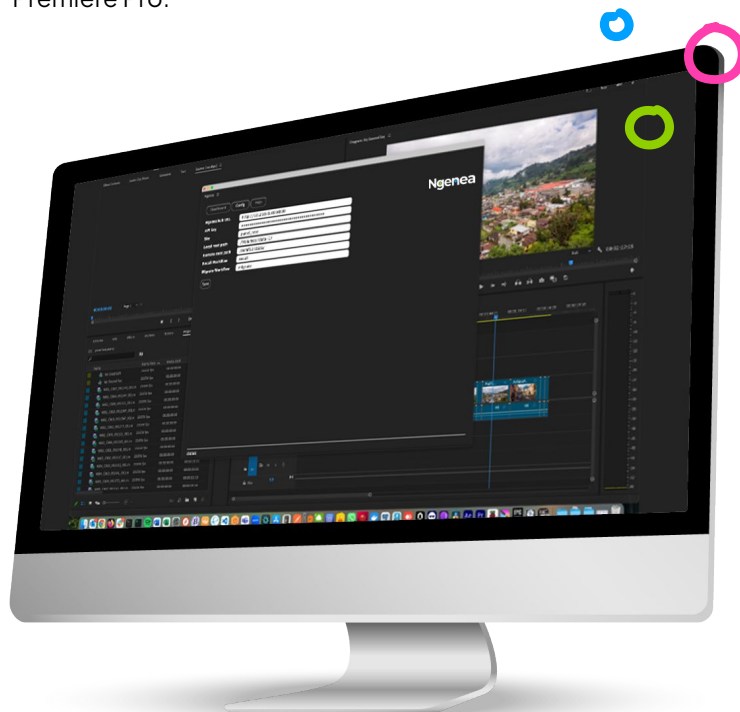

- **Invisible delays:** You don't know which clips are archived until you hit them
- **No progress feedback:** Premiere Pro just stops responding while recalls happen

- **Inefficient restores:** Clips download individually instead of in batches
- **Wasted time:** You discover archive delays during editing, not before

**The result?** Creative sessions turn into waiting sessions. Deadlines slip. Editors lose momentum at the worst possible moments.

### The Solution: Take Control of Your Archived Media

The Ngenea Panel for Premiere Pro puts you in control. See which clips are archived, restore them before you need them, and track progress in real-time—all from inside Premiere Pro.

# What You Can Do

## See Everything Before You Edit

- Open your project and instantly see which clips are on fast storage vs. archived
- No more surprises when you hit the timeline
- Know exactly what needs to be restored before your session starts

## Restore Intelligently, Not Individually

- Select all archived clips and restore them in one batch operation
- Watch real-time progress as clips restore from archive to high-performance storage
- Intelligent batch restores work faster than one-at-a-time on-access recalls

## Stay in Your Creative Flow

- Start batch restores when you arrive in the morning
- Grab coffee while clips restore with visible progress tracking
- Begin editing with all assets on fast storage —no interruptions, no waiting

## Close the Loop

- Finished with a project? Archive it back to cost-effective storage with one click
- Free up expensive fast storage for active work
- Complete the lifecycle without leaving Premiere Pro

## The Result

### Edit without interruption.

Pre-stage everything before you start.

### Stay informed.

Real-time progress means no surprises.

### Work smarter.

Batch operations eliminate bottlenecks.

## How It Works

### Simple, Intuitive Workflow

1. **Open your project** in Premiere Pro
2. **Launch the Ngenea Panel** from Window → Extensions → Ngenea
3. **View instant status** of all project clips and their current storage locations
4. **Select and restore** archived media to high-performance storage with one click
5. **Monitor real-time progress** as assets restore from archive
6. **Edit without interruption** once restoration is complete
7. **Archive completed work** back to cost-effective storage when finished

The panel automatically detects all clips in your project and shows their storage status. One-click batch operations make it simple to move assets where you need them.

## Powered by

## Pixstor & Ngenea

This integration is powered by intelligent storage infrastructure designed for media workflows:

**Pixstor** delivers the high-performance storage that demanding 4K/8K video production requires. **Ngenea** provides intelligent, policy-driven data management that automatically optimizes storage costs by moving assets between performance tiers—from high-speed NVMe to cost-effective cloud and nearline storage.

Together, they enable facilities to maintain petabyte-scale archives while keeping active projects on fast storage. The Ngenea Panel for Premiere Pro brings this intelligence directly into your creative workflow, giving you visibility and control at the project level.

## Technical Specifications

### Platform Support

- Premiere Pro on MacOS and Windows
- Integrates via Adobe ExtendScript API

### Infrastructure Requirements

- Pixstor 6.6+ with Ngenea Hub 2.3+
- Network connectivity to Ngenea Hub API

## For Editors Who Work with Archived Media

Whether you're cutting terabytes of 4K/8K footage, reopening older projects, or collaborating across distributed teams with tiered storage, the Ngenea Panel for Premiere Pro keeps you in creative flow.

### Stop waiting

Restore everything you need before your session starts

### Stay informed

Real-time progress, no more mystery freezes

### Work confidently

Access petabyte-scale archives without workflow disruption

**Adobe** is an American software company founded in 1982, known for developing multimedia and creativity applications that have become industry standards. [adobe.com](https://www.adobe.com)

Adobe, the Adobe logo, and Adobe Premiere Pro are either registered trademarks or trademarks of Adobe in the United States and/or other countries.

**Pixitmedia by DataCore**, is a leading provider of intelligent content and metadata management solutions for the media and entertainment industry. We go beyond storage to deliver a smarter ecosystem for media workflows, with end-to-end solutions that combine high-performance file, nearline, and archive platforms with metadata enrichment, indexing, and search. Enabled by data orchestration tools, our multi-tier technology simplifies content management and migration to ensure media assets are always where our customers need them.

Pixitmedia's innovative solutions integrate seamlessly into existing M&E workflows, optimizing efficiency and collaboration at every level – from ingest to archive to delivery. With Pixitmedia, content is always searchable, secure, and available whenever it's required.
